Professional Summary

Hans has a strong proficiency in Ruby, which he began studying towards the end of 2019 specifically for Ruby on Rails development. He possesses solid skills in JavaScript, Python, Java, PHP, CSS, and HTML as well. When it comes to frontend development, he prefers utilizing frameworks like Bulma, Tailwind, and Bootstrap. His GitHub profile showcases a diverse range of projects, but one that he is very proud of is a Facebook clone he created. This project adopts the MVC architectural pattern and boasts features such as "liking," "friending," a news feed (timeline), and more. All his projects are conveniently accessible on his GitHub profile (linked above). Beyond coding, Hans finds pleasure in the realm of game modding, having successfully modded titles like Battle for Middle-Earth 2 and Hearts of Iron IV. Before embarking on his studies in Canada, he made significant contributions as a Parliamentary Assistant and Administrative Assistant.
